

Model R200: Best choice for compact tractors

The R200 model is a compact design affording strength and durability. Ideal for tractors up to 20 hp in gardening, vineyard, and orchard applications.

A unique rotor blade configuration provides ease of penetration with a high level of hp efficiency.

A cantilever hitch design provides compact attachment, makes lifting easy and maximizes available hp.

Trailing board shape allows an even flow of soil and a level finish. Easy to adjust.

Rotavator 200-105. Specially designed for compact tractors.

Chain side drive equipped with 1" chain.

The rotor with blades 9941/42 is very effective.

Durable chain side drive

Unlike many competitive models, R200 models are equipped with a heavy 1 inch drive chain for long life.

Adjustable parking stand provides stability for storage and hook-up to tractor.

Rotacadet blades

Rotacadet blades are made of high quality steel for long life. The unique curvature allows penetration of hard soil with ease.

For ease of maintenance, blades are readily exchanged.

Versatile mounting

The R200 can be operated on center or in an offset mounting utilizing the moveable lower brackets.

R200 Specifications

Model	Working width		Transport width		Speed rpm	Weight		Number of blades	Tractor (HP)
	cm	in	cm	in		Kg	Lbs
